

PROMPT ENGINEERING – Practice Questions (Modified)

1. Write an RTCFR prompt to generate a YouTube video script about Generative AI for college students. (3 Marks)

PROMPT

Role:

You are an experienced AI instructor and professional YouTube content creator.

Task:

Create a YouTube video script explaining "Introduction to Generative AI" for beginners.

Context:

The audience consists of Indian college students who are completely new to Artificial Intelligence. Explain the concepts using simple English, Tanglish, and relatable real-life examples. Keep the script engaging and easy to understand.

Few-shot Example:

Title: "What is Machine Learning?"

Introduction:

"Hi everyone! Today we'll learn what Machine Learning is using simple examples from our daily life."

Response Format:

- 1. Video Title**
- 2. Introduction**
- 3. What is Generative AI?**
- 4. Daily Life Example**
- 5. Key Benefits**
- 6. Conclusion**
- 7. Like, Share & Subscribe Message**

2. Write a prompt to create a professional email template for a student helpdesk system. (3 Marks)

PROMPT

Act as a professional business email writer.

Create an email template for a university helpdesk.

Scenario:

A student submits a complaint through an online portal. The complaint details are saved in a database. Generate a professional email that informs the support team about the new complaint, including student information and issue details.

Use a formal, polite, and concise tone.

3. Write a Sequential Prompt Chain for creating a technology blog article. (3

Marks)

PROMPT

Prompt 1:

Generate 10 blog ideas on Artificial Intelligence.

↓

Prompt 2:

Select the best topic based on current trends.

↓

Prompt 3:

Create an SEO-friendly blog title.

↓

Prompt 4:

Write a detailed blog article.

↓

Prompt 5:

Generate a meta description and relevant keywords.

4. Include: identify business challenges, evaluate AI solutions, compare options, recommend the best solution, and explain the reasons. (3 Marks)

PROMPT

Act as an AI technology consultant.

A retail company wants to improve customer service using Artificial Intelligence.

Think step by step.

- 1. Identify the current business challenges.**
- 2. List possible AI-based solutions.**
- 3. Compare the available solutions.**
- 4. Recommend the most suitable solution.**
- 5. Explain why it is the best choice.**
